Synopsis:

CamTech AI Seminar Series is the platform that aims to bring together individuals passionate about artificial intelligence from diverse backgrounds to connect, share ideas and collaborate. This upcoming CamTech Seminar AI series will focus on **ChatGPT And Its Ethical Applications**. During this event, participants will learn about ChatGPT, how it was created, what are the research problems behind this impactful AI platform that is changing the way we teach, learn and work, and how to ethically use these tools. In addition to this, participants will have the opportunity to attend a panel discussion on “**ChatGPT for higher education: to ban or not to ban, that is the question**”. Overall, the event promises to be an enlightening and thought-provoking experience for attendees on ChatGPT, its applications and implementation ethics.
