

Artificial Intelligence

Privacy Vs. Innovation

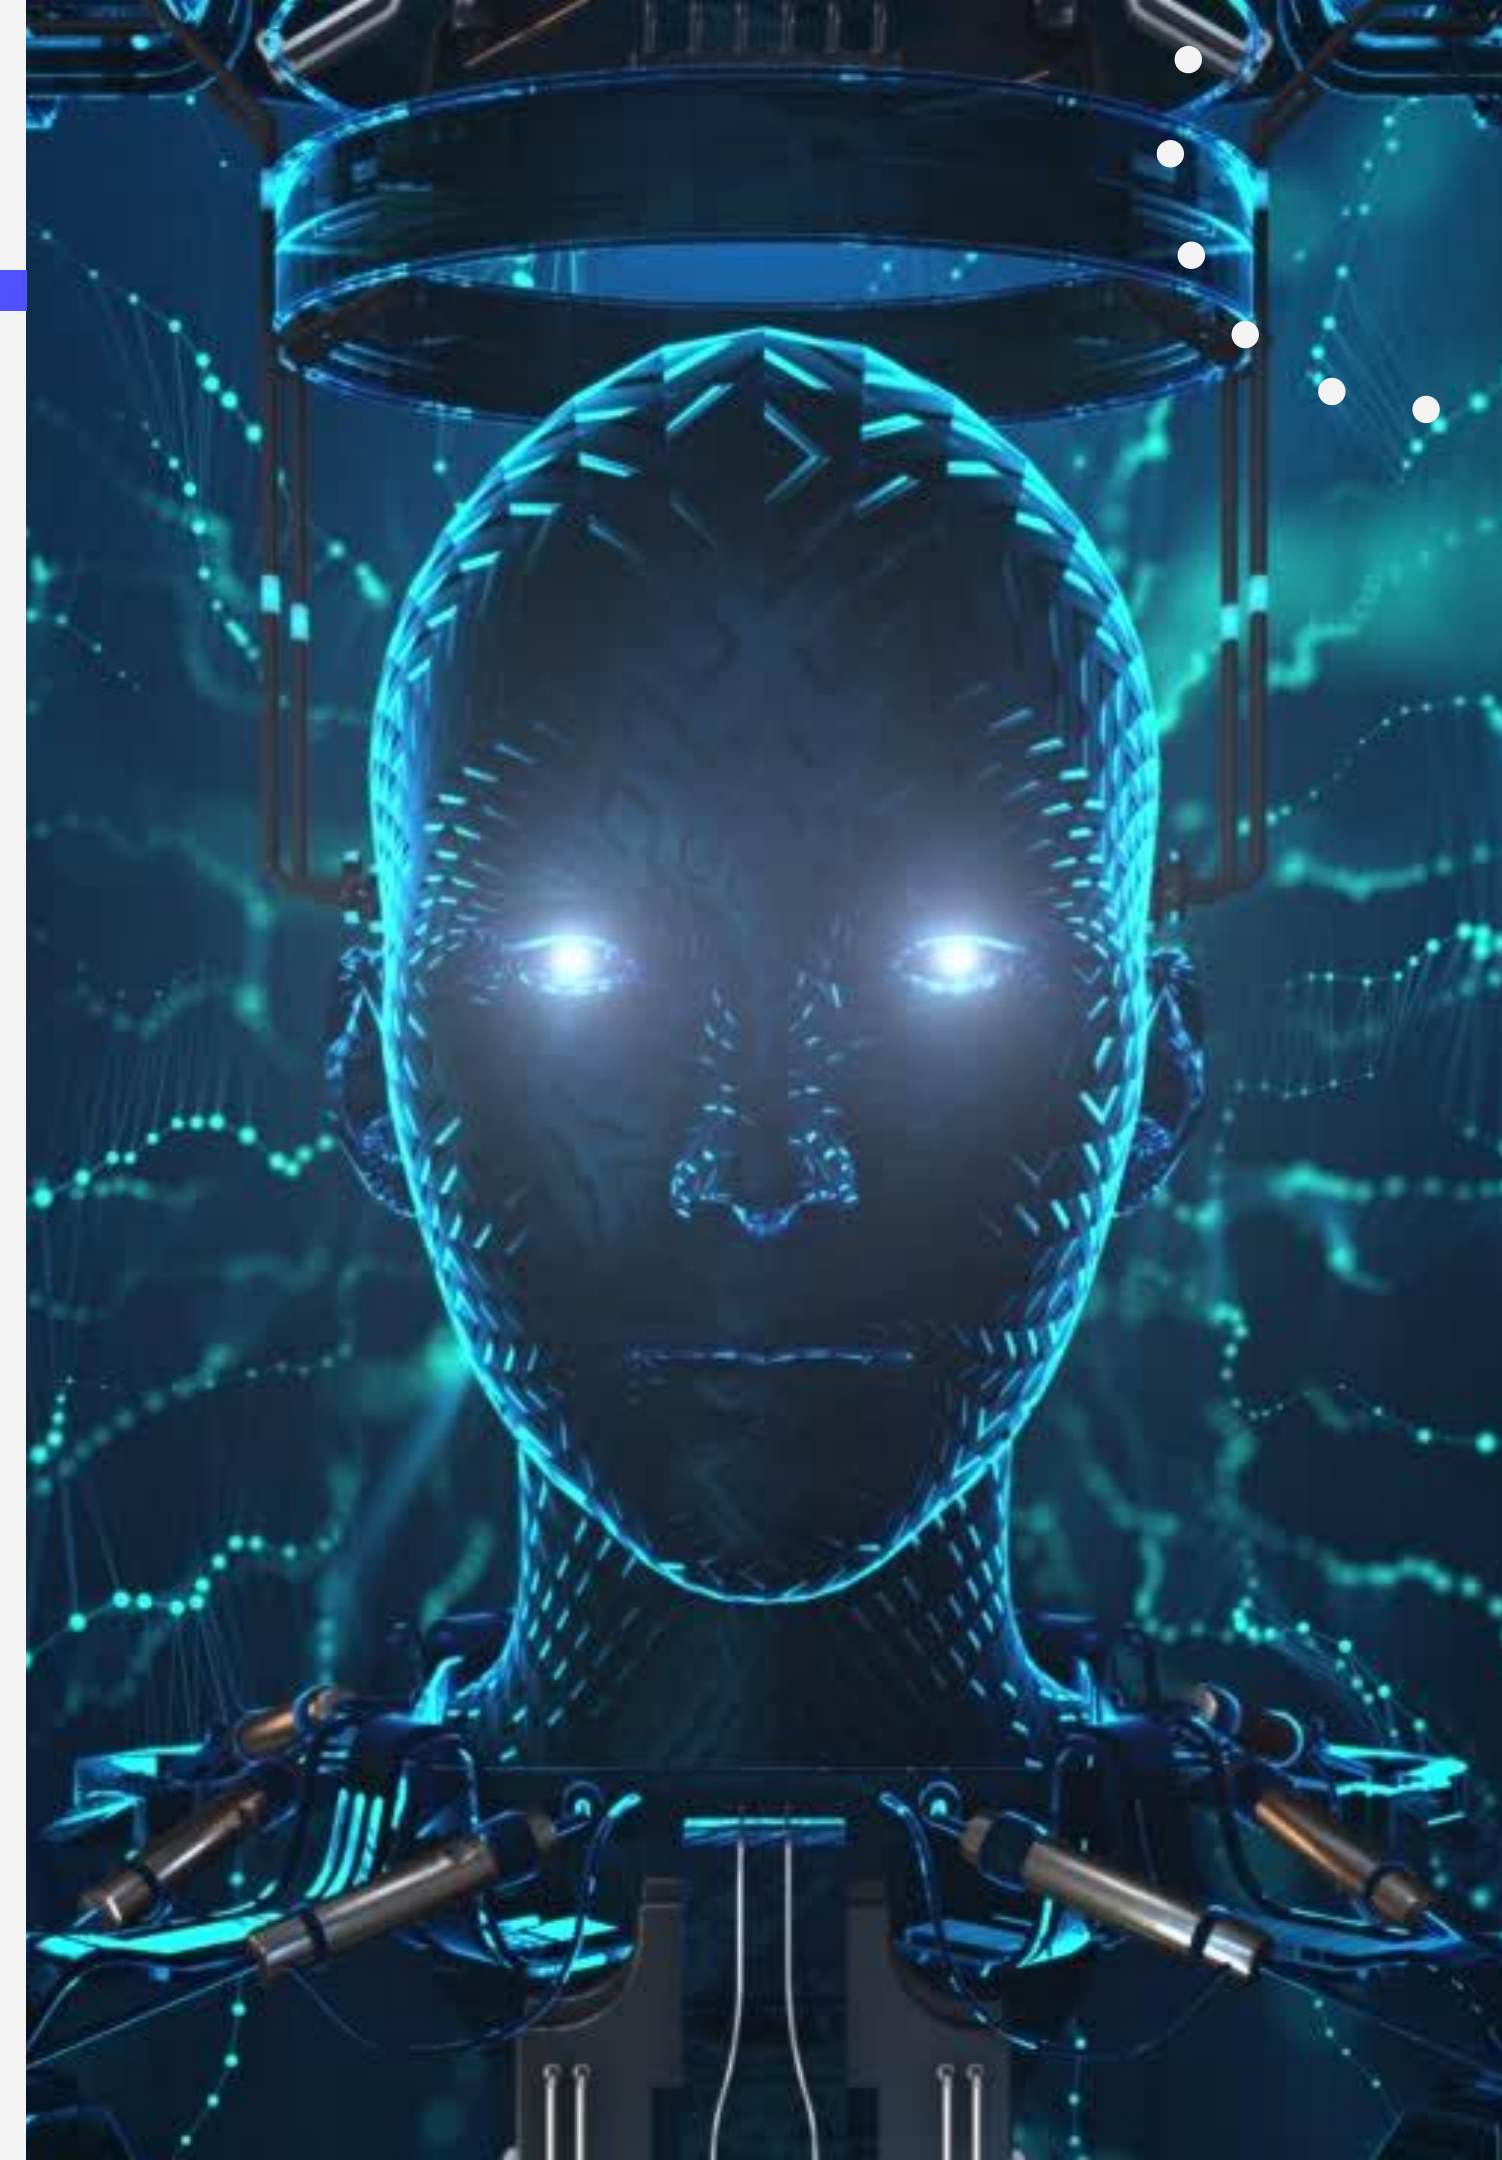

Common AI Use Cases

Automation of repetitive tasks
Process optimization
Predictive analytics
Personalized UX/CX

Banking: Fraud detection, CS/Chatbot, AML, KYC, Credit score, financial advice

Others: Social media, ecommerce, Voice command, Email filtering, Ride-hailing,

Smart Devices, Image recognition

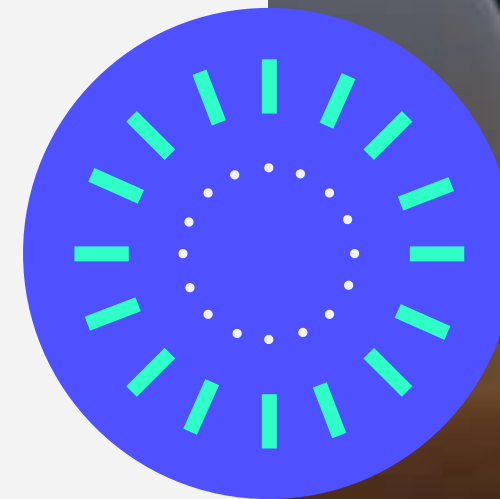

AI Readiness

- LLM
- Integration
- HW / Computing power
- Planning / experts
- Verification / enhancement

AI Challenges

- Ethical usage
- Data security & privacy
- Bias in algorithms
- Legal AI issues
- AI transparency

Address Challenges

Collaboration
Transparency
Education
Regulation

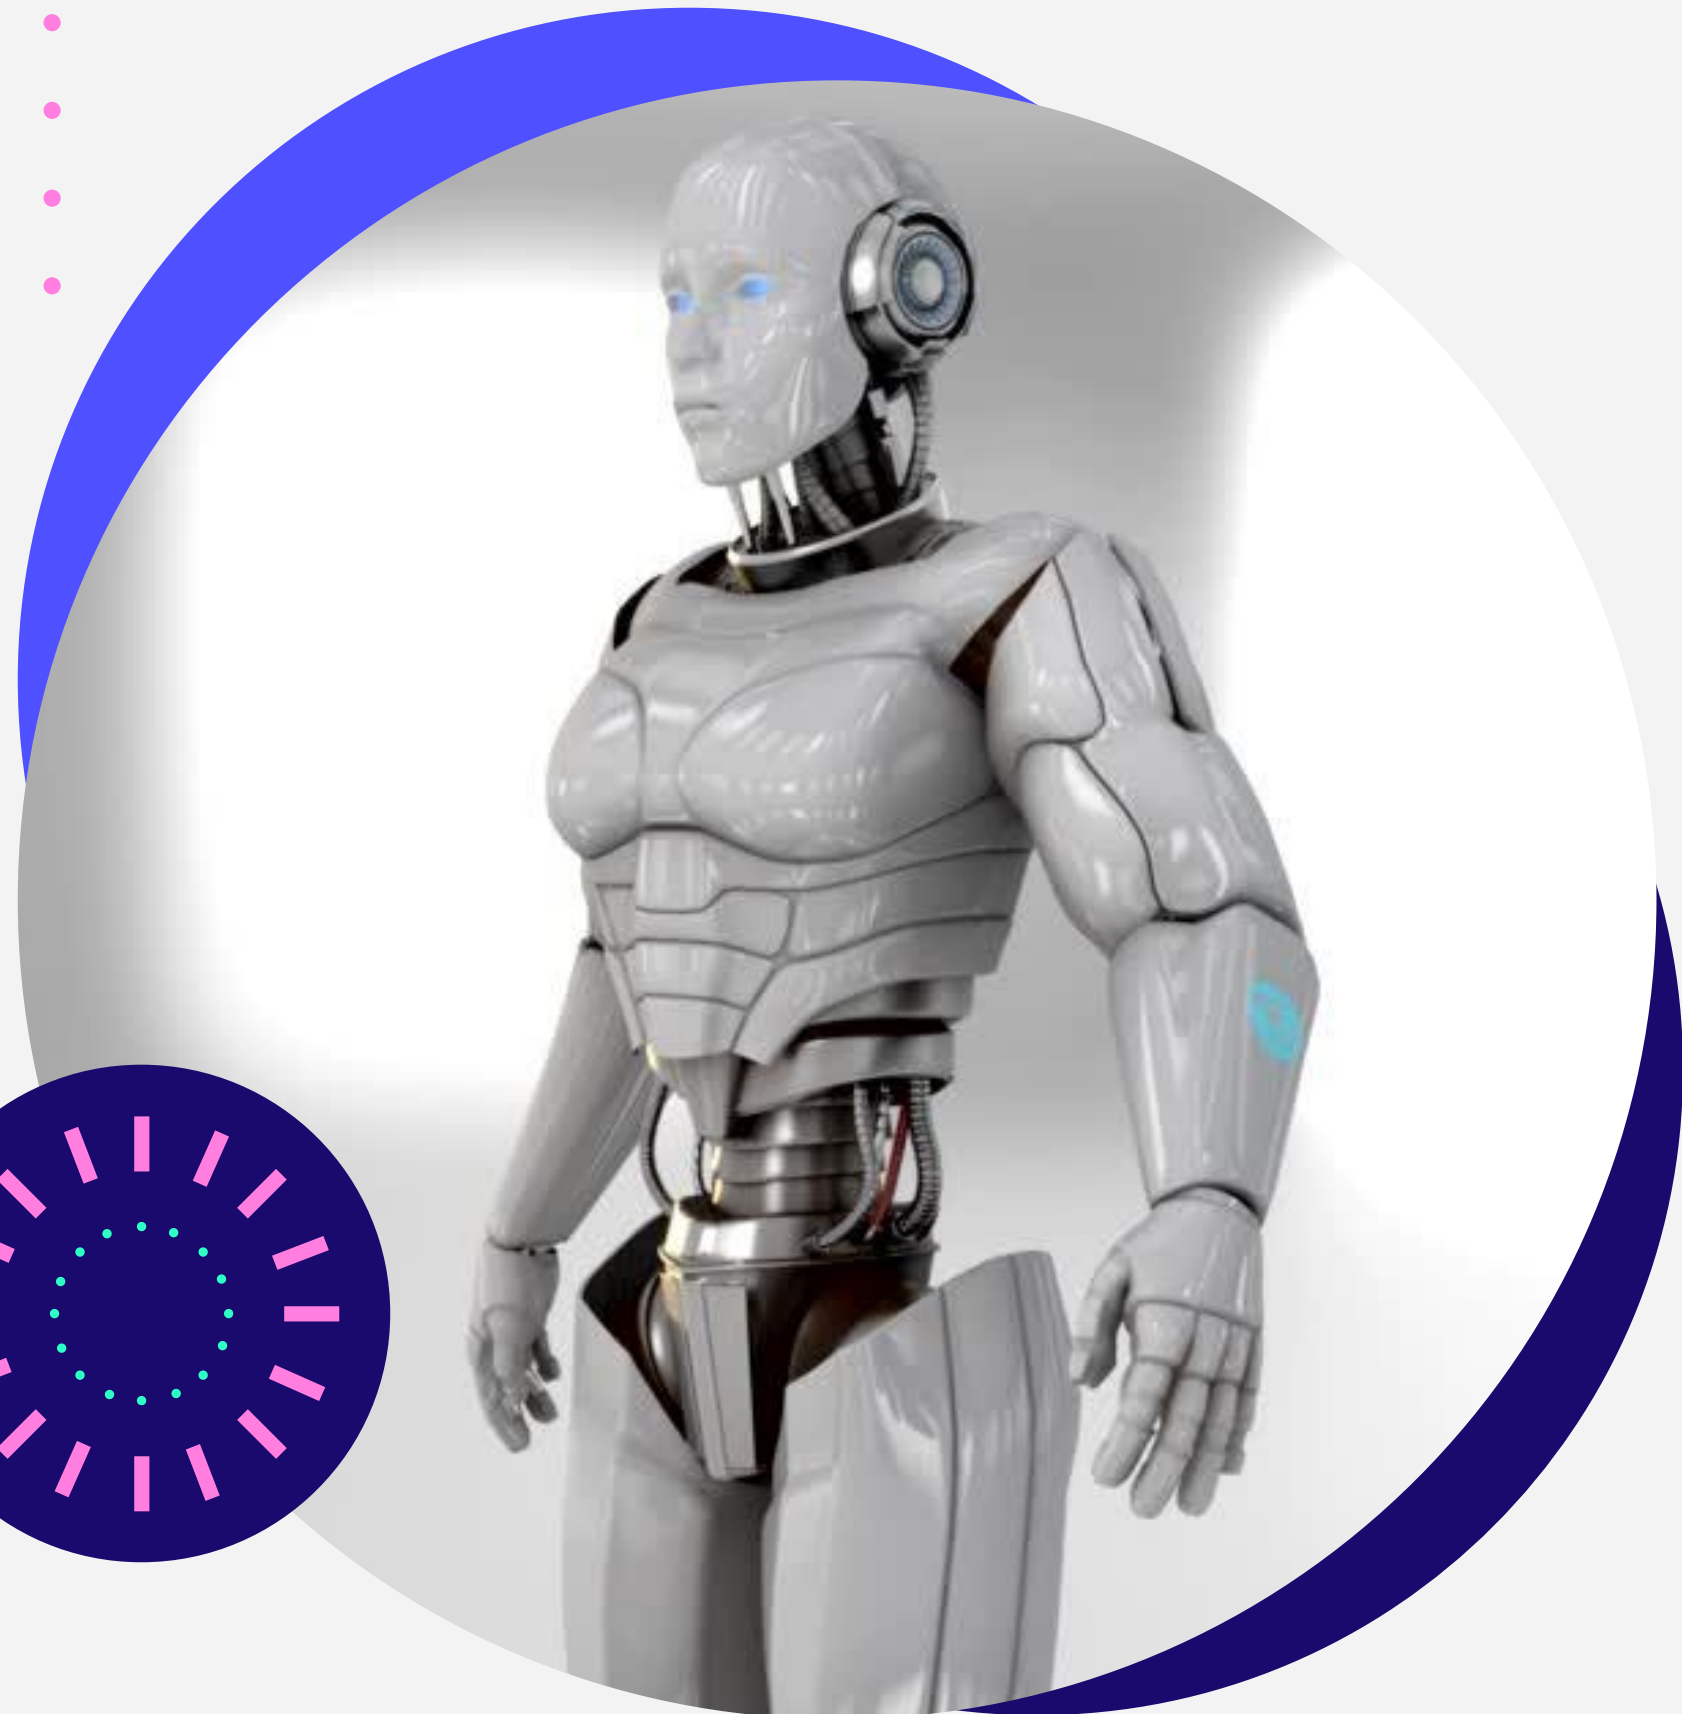

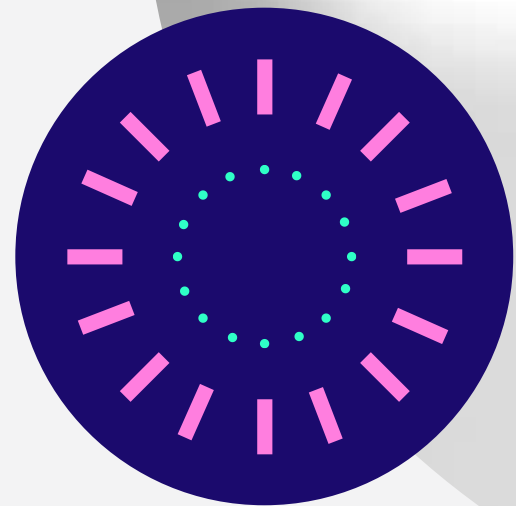

Future Trends

A(G)I will move much faster than we all thought, do more than we all could imagine.

Catch it up responsibly.

**Thank
You!**
